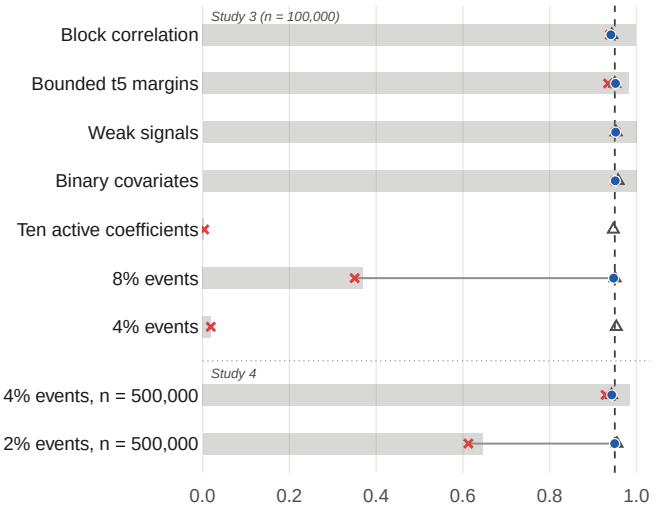
a Variance components (Study 1, OPT)
Coverage of nominal 95% intervals
1.0
0.8
0.6
0.4
0.2
Total
Γ−only
Ω−only
Γ−only: subsampling variance alone
Ω−only: inference−split variance alone
0.2
0.4
0.6
0.8
1
Share of subsampling variance in the total



b Screening challenges (OPT, largest budget)
Study 3 (n = 100,000)
Block correlation
Bounded t5 margins
Weak signals
Binary covariates
Ten active coefficients
8% events
4% events
Study 4
4% events, n = 500,000
2% events, n = 500,000
